Hello everyone. Today I would like to talk about my father. He is 60 years old now. But he is still working for a company. He has been working for more than 40 years.

He started working after finishing high school. A few years later, he got married and had three children. He worked from morning to night. After he finished working, he came home and helped his children with their homework. He studied a lot for his children.

When he was 40 years old, he decided to take a night course at a university. It was a big *decision. So all of his family supported him. Though it was a very hard life, he never *complained. He got up early in the morning, worked at his company, went to the university and came home late at night. The life lasted until he was 46 years old. At last he graduated from the university. At the graduation ceremony, all of his family came and *celebrated his graduation.

He has been working harder than before since he graduated from the university. He always advised his children to study while young. So his children liked to study and went to universities. One of them became a teacher, and the others became doctors. I am the one who became a teacher. Thanks to my father, I like to study and can keep studying for a long time.

Some day, I want to be a father like him and make a family like his. Thank you for listening.

*decision : 決定 *complain : 不平を言う *celebrate : 祝う
